

Hundreds Hideously Boil'd

Invisible
Enveloping
Perspiring
Dehydrating
Palpitating
Impaired vision,
Air smells burn'd!

One hundred seven Fahrenheit
(Forty-one point six Celsius)

Plasmalemma melts

Proteins unfold

Bonds break

Body unravels

Tiny kidney tubes collapse

Muscle tissue disintegrates

Intestines perforate

Toxins lace bloodstream

Clotting cascade

Proteins gone,

Haemorrhaging everywhere!

Bank-fund'd
Fossil-fuell'd

South American HEAT,
Climate winter/spring firestorms
Bonemeal-dry

Lake Tefé, NW Brazil
Godforsaken unceasing heatwaves,
Amazon River dolphins
Hundreds boil'd to DEATH,
King vultures feeding frenzy.
Heaven help ALL life!
